

Our Vision

- We want to help people with disabilities have opportunities, options and choices to do what they want to do.
- We want to assist people to advocate for what they want, not what others think they want or is in their best interest.
- Help the agency focus on providing services in line with a customer-centered philosophy.
- Increase awareness of advocacy and self-advocacy issues - give people encouragement and skills to advocate for themselves.
- We want people with disabilities to be seen and heard at all levels (personal, system, legislative) where decisions are made about them.
- “Nothing about me without me.”
